### **DIRECTIONS**

Do you enjoy solving puzzles? 4x4 Sudoku is a super fun game that you can have a blast playing! Here's how it's done: First, look at the grid to find any empty squares that have numbers in the same row, column or 2x2 box. Write down all the possible digits that could go in each square. Pick a square and fill it with a number not already in the same row, column or 2x2 box. Keep going like this until all the squares are filled with the numbers 1-4. After that, make sure each row, column, and 2x2 box has exactly one number from 1-4. Have fun and good luck!
